

Horticulture & Landscape Supervisor Advanced Apprenticeship

Apprenticeship

Horticulture and Landscape Supervisors can be employed to oversee work in public parks and gardens, green spaces and historic gardens, private gardens and estates or in production nurseries and retail outlets. Many businesses will be specialised in their activities; such as grounds maintenance (soft-landscape) or landscape construction (hard-landscape). Soft-landscaping includes the establishment and maintenance of plants and cultivated areas. Hard-landscaping includes establishment of hard surfaces and structures in addition to the establishment of plants in cultivated areas.

The distinct nature of these two specialisms means very few businesses can offer the full breadth of skills and therefore two options are available for this occupation; horticulture and landscape construction. The employment area will dictate the option pursued.

A Horticulture / Landscape Supervisor can manage a site with minimum supervision, supervise a team and maintain the health and safety and security of personnel and resources.

Working and learning in the horticulture and landscape industries is rewarding, offers a diverse range of employment opportunities and includes a range of skills that are transferable into other industries following further studies.

While learning the practical side of Horticulture with your employer, you will also be required to attend college on a block release programme. While studying at Bicton College you can take advantage of the College's estate, which houses an arboretum with veteran and specimen trees, grounds, gardens Inc. a walled garden, glasshouses, growing tunnels and over 200 acres of extensive parklands with plenty of opportunities for you to develop your Horticulture skills.

Do you live far from the college? No problem! Accommodation is available on site!

Prior to end-point-assessment you will need to achieve these qualifications:

- Emergency first aid: Level 3 award in emergency first aid at work.
- Level 2 Award in the Safe Application of Pesticides using Pedestrian Hand Held Equipment (required for the application of chemical controls for vegetation control and plant health treatments)
