

Success with Propagation

Adult

Taking cuttings is one good way to propagate a wide range of your plants. There are a number of other methods including: layering, suckers and division. Learn how to improve your success rates by propagating a range of plants. Discuss the selection of plant material for propagation purposes. Also, the control of common pests and diseases as well as propagation equipment. This course is recommended for anyone who is interested in growing new plants from cuttings particularly ornamentals.

If you are a new gardener or working in the industry this is an opportunity to improve your propagation skills.
